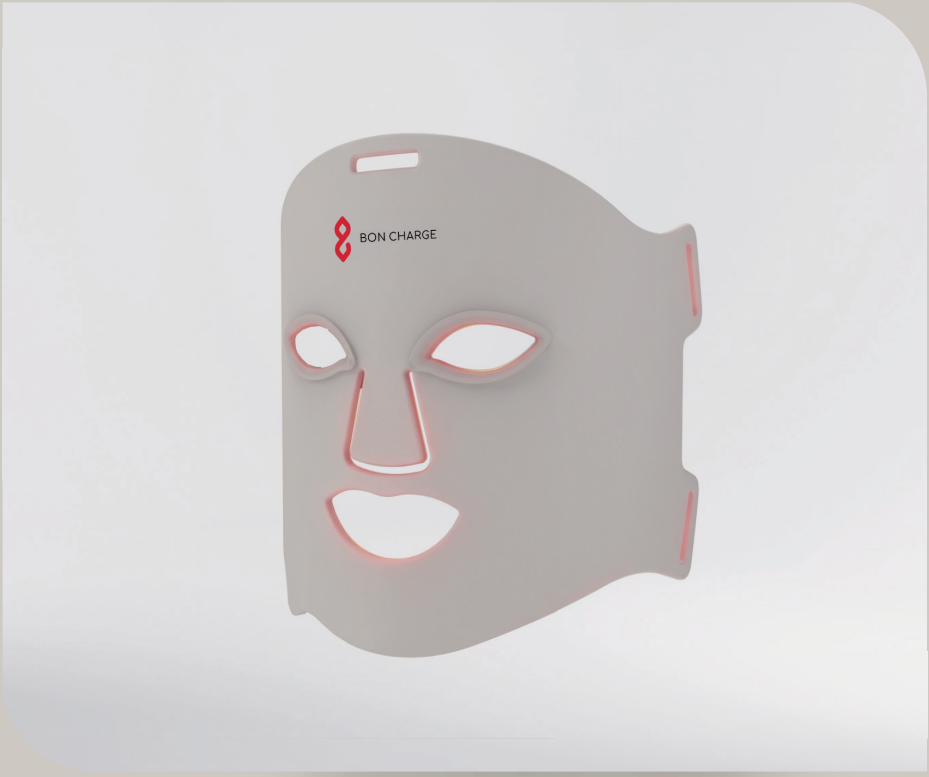
BON CHARGE

Red Light Face Mask Pro

User Manual



IMPORTANT

- Read this manual carefully before using the device.
- Keep this manual for future reference. Use the device only as described in this manual.
- If you have a medical condition, are undergoing medical treatment, are taking medication that may increase light sensitivity, or are unsure whether this device is suitable for you, consult a qualified healthcare professional before use.

PRODUCT DETAILS

01 Product Identification

Product	BON CHARGE Red Light Face Mask Pro™
Light wavelengths	630 nm red light and 850 nm near infrared, and 1072 nm near infrared
LED count	233 dual-core LEDs (630 & 850 nm)+ 19 triple-core LEDs (630, 850 & 1072 nm)
Power supply	5V DC, 2A
Battery type	Rechargeable lithium-ion
Model Number	MK-252 Pro
Session time options	10, 15 or 20 minutes
Use area	Face
User group	Adults aged 18 years and over

WHY WE MADE IT

02 Intended Purpose

Targeted multi-wavelength design. Advanced at-home skincare. Visible support for facial contours and early aging zones.

The BON CHARGE Red Light Face Mask Pro is designed to support the visible appearance of the skin across key facial contours and areas associated with early signs of aging. It combines visible red light with dual near infrared wavelengths as part of an advanced at-home skincare and beauty routine.

The Pro design includes 233 dual-core LEDs using 630 nm red light and 850 nm near infrared light, plus 19 triple-core LEDs using 630 nm red light, 850 nm near infrared light and 1072 nm near infrared light. The 1072 nm near infrared light is included in selected areas of the mask to complement the broader multi-wavelength design and support a firmer, smoother and more lifted-looking appearance.

When used as directed, the device may help:

- Support the visible appearance of firmness across key facial contours
- Promote a more lifted, firm and youthful-looking appearance
- Refresh areas associated with early visible signs of aging
- Reduce the visible appearance of fine lines and wrinkles
- Help skin appear smoother, firmer and more refined
- Support a brighter, more radiant-looking complexion
- Promote a more even-looking skin tone and texture
- Help the face appear less puffy, tired and stressed
- Support softer, smoother-looking skin with continued use

WHO THIS IS FOR

03 User Requirements

This device is intended for:

- Adults aged 18 years and over and
- Individuals who can follow safety instructions and stop use if discomfort occurs
- Individuals using the device in a home or wellness environment
- Individuals with Fitzpatrick Skin Types I–IV

The Fitzpatrick Skin Type Scale is a classification system based on how skin typically responds to sun exposure.

Fitzpatrick skin type	Description	Typical response to sun exposure
Type I	Very fair skin	Always burns, does not tan
Type II	Fair skin	Usually burns, tans minimally or with difficulty
Type III	Medium skin	Sometimes burns, gradually tans
Type IV	Olive or light brown skin	Rarely burns, tans easily
Type V	Brown skin	Very rarely burns, tans very easily
Type VI	Dark brown to deeply pigmented skin	Very rarely or never burns, deeply pigmented

If you have Fitzpatrick Skin Type V or VI, consult a qualified healthcare professional or dermatologist before use.

If you are unsure of your Fitzpatrick skin type, or if you have a history of pigmentation changes (including post-inflammatory hyperpigmentation (PIH), or hormone-related pigmentation changes), melasma, hyperpigmentation, photosensitivity, or unusual reactions to light-based products, consult a qualified healthcare professional or dermatologist before use.

DO NOT allow children to use, clean, charge or play with the device.

If the user has reduced physical, sensory or mental abilities, the device should only be used with close supervision from a responsible adult who has read and understood this manual.

HOW IT WORKS

04 Device Description

The BON CHARGE Red Light Face Mask Pro is a wearable multi-wavelength light device designed for facial use as part of an advanced at-home skincare and beauty routine. It combines visible red light with dual near infrared wavelengths to support the visible appearance of the skin.

It uses:

- **Red light, 630 nm:** visible light used as part of a cosmetic skincare routine to support a smoother, more radiant-looking complexion.
- **Near infrared, 850 nm:** non-visible light used as part of a general wellness and beauty routine to support refreshed-looking skin.
- **Near infrared, 1072 nm:** non-visible light included in targeted triple-core LEDs in selected areas of the mask to support a more advanced multi-wavelength skincare experience, including targeting advanced signs of aging, and a more supported youthful appearance.

The Pro design includes 233 dual-core LEDs using 630 nm red light and 850 nm near infrared light, plus 19 triple-core LEDs using 630 nm red light, 850 nm near infrared light and 1072 nm near infrared light.

NOTE: The 850 nm and 1072 nm near infrared wavelengths are not visible to the human eye. When NIR mode is selected, the mask may not appear fully illuminated, or some areas may not visibly illuminate. This is expected and does not mean the product is faulty

05 Technical Specifications

LED wavelengths	630 nm： 20mW/cm^2 850 nm： 5mW/cm^2 1072 nm： 5mW/cm^2
Irradiance	30 mW/cm^2
LEDs	233 dual-core LEDs (630 & 850 nm)+ 19 triple-core LEDs (630, 850 & 1072 nm)
Optimal operating ambient temperature	0°C to 35°C / 32°F to 95°F
Storing and transport temperature	-5°C to 45°C / 23°F to 113°F
Optimal operating ambient humidity	30% to 95% without condensation
Storage and Transport Humidity	20% to 95% without condensation
Charging supply	5V, 2A
Charging port	USB-C
Charging cable	USB-C to USB-C
Charging cable length	1 meter / 3.28 feet
Charging adapter power output	2A
Charging time	Less than 240 minutes / 4 hours
Timer settings	10 / 15 / 20 minutes
Dimensions of the device	216.8 x 331.6 x 9.1 mm
Certification	CE, UKCA, RoHS, FCC, CA65, RCM, REACH. Tested to applicable electrical safety and EMC standards.
Weight of the device	0.45 kg / 15.9 oz

Battery Information

Battery detail	Information
Battery category and identification	Lithium-ion
Capacity (rechargeable batteries)	3.7V, 2600 mAh per cell
Battery chemistry	Gel polymer lithium-ion cell
Battery weight	46.5 grams per piece
Manufacturing plant location	6/F, Building 1, No. 21 Nanshe Road, Humen Town, Dongguan City, Guangdong Province
Information on hazardous substances	Hg = 0%, Cd = 0%, Pb = 0%
Critical raw materials	Lithium, cobalt and graphite

WHAT'S IN THE BOX

06 *Supplied Accessories*

QTY	PRODUCT
1	BON CHARGE Red Light Face Mask Pro
2	Eye shields
1	Controller
1	User manual
1	Set of fastening straps
1	USB-C charging cable
1	Protective travel pouch

DO NOT use the device if any supplied part is missing, damaged or appears modified. Contact BON CHARGE customer support.

READ BEFORE FIRST USE

07 Important Safety Information

Read all instructions carefully before use.

Safety information in this manual is grouped as follows:

- **Contraindications:** Situations where the device must not be used.
- **Warnings:** Hazards that could result in injury, discomfort, device damage or unsafe use.
- **Precautions:** Steps that help support safe and effective use.

WARNING: Stop using the device immediately and consult a healthcare professional if you experience discomfort, skin irritation, skin discolouration, bruising, contact burns, dizziness, nausea, headaches, light-headedness or any other unexpected reaction.

Rare but possible side effects may include:

- Skin irritation
- Bruising
- Contact burns
- Dizziness
- Nausea
- Headaches

ONLY use the device on normal, intact, clean and healthy skin.

ONLY use the device on the face.

WHEN NOT TO USE

08 Contraindications

- **DO NOT** use the device if any of the following apply:
- **DO NOT** use the device if you have active cancer or a cancerous lesion.
- **DO NOT** use the device if you are pregnant, planning to become pregnant, or breastfeeding.
- **DO NOT** use the device if you are under 18 years of age.
- **DO NOT** use the device if you have severe acne.
- **DO NOT** use the device if you have phlebitis, thrombophlebitis or varicose veins in the intended use area.
- **DO NOT** use the device if you have a known allergic reaction to silicone or synthetic materials that contact the skin.
- **DO NOT** use the device if you have a photosensitive disorder or sensitivity to light.
- **DO NOT** use the device if you have a skin condition unless you have first consulted a healthcare professional or dermatologist. .
- **DO NOT** use the device if you are taking medication or drugs that may cause photosensitivity.
- **DO NOT** use the device if you experience light-induced headaches.
- **DO NOT** use the device if you have a history of seizures or epilepsy triggered by light.
- **DO NOT** use the device if you have recently had surgery or another procedure in the intended use area.
- **DO NOT** use the device if you have swollen, infected or inflamed skin, skin eruptions, open wounds, or areas with reduced sensation.
- **DO NOT** use the device over areas of melasma, hyperpigmentation or changing pigmentation unless you have first consulted a healthcare professional or dermatologist.
- **DO NOT** use if you are taking medication to treat any skin condition. Consult your healthcare professional prior to use,

If you are unsure whether any of these apply to you, consult a healthcare professional before using the device.

READ CAREFULLY

09 Warnings

WARNING: STOP use immediately if the device feels hot, your skin feels uncomfortably warm, the device overheats, or you experience discomfort, dizziness, light-headedness, difficulty breathing or difficulty swallowing.

Children and supervised use

- **DO NOT** allow children to play with, clean or charge the device.
- **DO NOT** use, clean or store the device near children or people with reduced physical or mental abilities without close supervision.

Maximum Session Time

- **DO NOT** exceed the available session time options shown on the controller.
- Session time options:
  - 10 minutes
  - 15 minutes
  - 20 minutes
- Start with the shortest comfortable session and use the device only as directed.

Skin, health and treatment areas

- **DO NOT** use the device to address rosacea, moles, warts, open sores, cancerous lesions or any skin condition.
- **DO NOT** use the device over a bacterial infection.
- **DO NOT** use the device on painful areas unless you have consulted a healthcare professional.
- **DO NOT** use the device on areas without pigmentation or areas affected by vitiligo unless you have first consulted a healthcare professional or dermatologist.

Eyes and use environment

- **DO NOT** shine the LEDs directly into your eyes or another person's eyes.
- **DO NOT** use the device outdoors.
- **DO NOT** use or store the device near hot surfaces.
- **DO NOT** store the device in extreme heat, extreme cold or direct sunlight.

Water, charging and power

- **DO NOT** charge the device near water or where it may come into contact with water.
- **DO NOT** submerge the device in water.
- **DO NOT** use any USB-C cable other than the cable supplied or approved by BON CHARGE.

The device should only be supplied with 5V DC low voltage. If any part of the adapter or cable is damaged, discontinue use and contact BON CHARGE customer support.

Device condition and handling

- **DO NOT** sit on, lie down on or step on the device.
- **DO NOT** drop or insert objects into any opening of the device.
- **DO NOT** use the device if it is not working properly, or if it has been dropped or damaged.
- **DO NOT** use the device if the device or charging cable is damaged.
- **DO NOT** modify, open, disassemble or attempt to repair the device.

Accessories, cleaning and product use

- **DO NOT** use the device with non-approved accessories.
- **DO NOT** use solvents or abrasive cleaners on the device.
- **DO NOT** use topical products, such as creams, moisturisers, gels, lotions, other cosmetics or makeup, with the device unless specified by BON CHARGE.
- **DO NOT** use the device in any way not described in this manual.

CARE FOR THE PRODUCT

10 Precautions

- Keep this manual available for future reference.
- Inspect the device, controller, cable and accessories before each use.
- **DO NOT** scratch or damage the light-emitting surface.
- Use the device only as described in this manual.
- The device is intended for use by one person. For hygiene reasons, sharing is not recommended.
- The device is designed for cosmetic use only by adults in good health.
- **DO NOT** place the device in fire.
- Dispose of the device according to local regulations.
- **DO NOT** use the device if you see signs of damage, including battery leakage.
- Ensure the device is dry before charging, storing or using it.

USE IT AS INTENDED

11 *Using the Device Safely*

To support safe use, DO NOT use the device in any of the following ways:

Use limits

- **DO NOT** use the device for longer than the recommended session time.
- **DO NOT** use the device more frequently than recommended.

Children and medical use

- **DO NOT** use the device on children or allow children to interact with it.
- **DO NOT** use the device as a substitute for medical advice or care.

Power, cables and accessories

- **DO NOT** use the device while it is charging.
- **DO NOT** use the device with damaged cables, damaged connectors or visible battery leakage.
- **DO NOT** use unapproved cables, chargers, accessories or topical products.

Handling and environment

- **DO NOT** expose the device to water, direct sunlight, high heat, high humidity or freezing conditions.
- **DO NOT** bend, crush, sit on, lie on or step on the mask.
- **DO NOT** shine the LEDs into anyone's eyes.

Repair or modification

- **DO NOT** attempt to repair, alter or open the device.

POWERING YOUR DEVICE

12 Charging and Power

WARNING: Before charging, ensure the plug, cable, controller and charging area are completely dry. Moisture during charging may result in electric shock, short circuit or fire.
Charge the device fully before first use. Use only a 5V adapter or computer USB port. USB charger not provided with the product. **DO NOT** use fast chargers, as they may damage the battery.

A full charge may take up to 4 hours. Charging time may vary depending on the power source used.

To charge:

- Insert the USB-C cable into the controller.
- Insert the USB end into a suitable USB power supply.
- Confirm that the LED indicator flashes slowly while charging.
- When the LED indicator turns off, disconnect the cable.
- Ensure the controller is unplugged before use.

The device will not operate while charging.

A MEASURED BEGINNING

13 Getting Started

13.1 Before First Use

Before first use:

- Read this manual in full.
- Check that all supplied accessories are present.
- Inspect the device, controller, straps, eye shields and charging cable for damage.
- Fully charge the controller using a suitable 5V power source. **DO NOT** use a fast charging device.
- Clean the device according to the cleaning instructions.
- Perform the light sensitivity test.
- **DO NOT** use the device if the test causes redness, itching, irritation, discomfort or any unexpected reaction.

13.2 Light Sensitivity Test

Before first use, perform a light sensitivity test.

Before performing the light sensitivity test, confirm that the device is suitable for your Fitzpatrick skin type. If you are Fitzpatrick Skin Type V or VI, or are unsure of your skin type, consult a qualified healthcare professional or dermatologist before using the device.

- Place the device on the inner forearm.
- Turn on the device and start a 10-minute session.
- Stop immediately if your skin feels hot or uncomfortable.
- After the session ends, remove the device.
- Wait at least 24 hours.
- Check the skin regularly during that 24-hour period.

If your skin appears red, itchy, irritated or uncomfortable, **DO NOT** use the device. Contact BON CHARGE customer support and consult a healthcare professional if needed.

A RECOMMENDED RHYTHM

14 Recommended Use

How often to use

- Use it one day, rest the next.
- Regular use every other day gives your skin regular exposure + recovery time between sessions. This helps support a balanced routine without overusing the device.
- More frequent use does not necessarily lead to better results.
- **DO NOT** use the device more frequently than recommended in this manual.
- Individual results may vary.

Skin condition and sensitivity

- **DO NOT** use the device after heavy sun exposure or on sunburned, reddened or irritated skin.
- **DO NOT** use the device on broken, irritated, infected, swollen or painful skin.
- **DO NOT** use the device after applying products that may increase photosensitivity.

A PLACE TO BEGIN

15 Directions for Use

WARNING: DO NOT use the device while it is charging. Ensure the device and your skin are dry before use.

STEP: 1

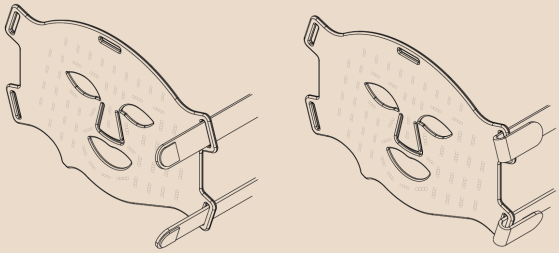
Charge the controller: Remove the controller and USB cable. Connect the cable to the controller, then connect the USB end to a suitable 5V power source (USB charger not provided). Charge the controller until the battery indicator shows three solid bars.

STEP: 2

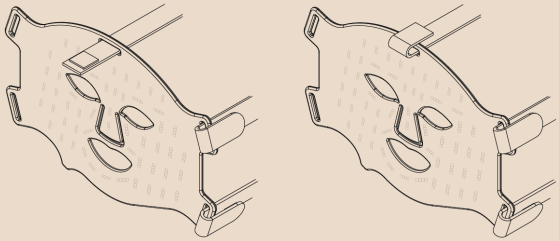
Attach the straps:

- Remove the mask and three fastening straps from the box.
- Place the mask on a flat surface with the inner LED surface facing upwards.
- Arrange the straps around the mask with the large square Velcro pads facing downwards
    - **Why this matters:** When the straps wrap around your head, the large square Velcro pads should face away from your head and hair for a smoother, more comfortable fit.

- Attach the large side straps to the left and right sides of the mask as shown below.



- Attach the top strap to the top of the mask.



- Position the mask over your face.
- Wrap the straps around your head:
  - Side straps first
  - Top strap last
- Readjust for comfort.

Diagram for illustrative purposes only.

STEP: 3

Insert the eye shields: Remove the protective film from the face mask and insert the eye shields into the eye cavities as indicated by the left and right markings.

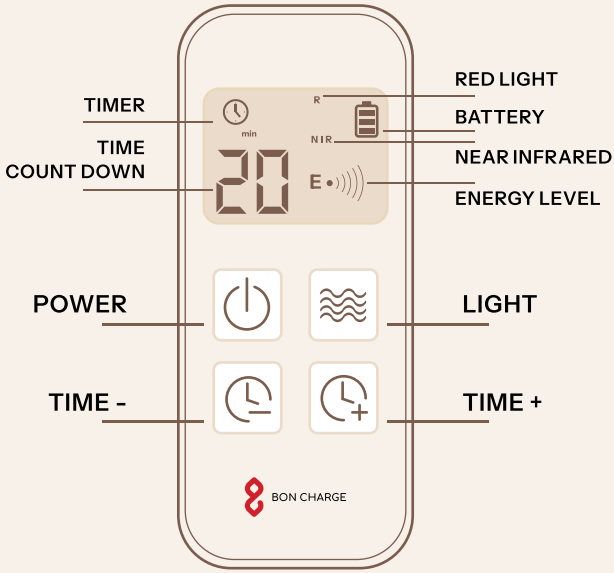
Step 4

Connect the mask to the controller: Connect the mask to the controller. Ensure the cable is firmly inserted. You should hear a click when it is correctly connected. Press the **POWER** button firmly to switch the device on.

Step 5

Select the light mode: Select red light, near infrared light, or both together.

- To activate red light, press the **LIGHT** button on the controller.
- When red light is active, the control panel will display "**R**" or "**R + NIR**", and the LEDs will illuminate red.
- **Near infrared light is invisible.** If NIR is selected and the mask does not visibly illuminate any brighter, this is normal.
- **NIR mode uses both near infrared wavelengths by default: 850 nm near infrared light throughout the mask and 1072 nm near infrared light in targeted triplecore LED areas positioned over early aging zones.**



Step 6

Select your session time: Select your preferred session length. Use **TIME +** to increase the time and **TIME -** to decrease the time.

Session time options:

- 10 minutes
- 15 minutes
- 20 minutes

Start with the shortest comfortable session and use the device only as directed. **DO NOT** exceed the session time recommended in this manual.

- The device switches off automatically after the selected session.
- You may stop the session at any time by pressing the **POWER** button.

STEP: 7

Wear the mask: ONLY use on clean and dry skin.
Place the mask on your face and fasten the straps around the back of your head. Adjust the Velcro straps until the fit feels secure and comfortable.
Relax during the session and remain alert to how your skin feels.

STEP: 8

Finish the session: After the session:

- Remove the mask.
- Switch the controller off by pressing the power button.
- Allow the mask to cool if needed.
- Wipe the inside of the mask with a damp cloth and allow it to air dry.
- Store the device in the supplied carry case.

AFTERCARE

16 Cleaning, Maintenance and Storage

Care and storage

- Store the device at room temperature in dry conditions.
- Store the device in the supplied pouch or original packaging.
- **DO NOT** bend, stretch or crush the device during storage or travel.
- Avoid dusty, damp or humid conditions.
- Avoid direct sunlight.
- Keep the device away from children.
- The device contains no user-serviceable parts.
- After each use, switch off the device and clean it according to the instructions below.

To help maintain the lithium-ion battery, allow the device to complete normal charge and discharge cycles during regular use.

Cleaning

WARNING: DO NOT clean the device while it is switched on or charging.

- Clean the device with a water-based wipe or a damp, clean cloth.
- For stubborn marks, gently wipe with 70% isopropyl alcohol (IPA).
- **DO NOT** use solvents, abrasive cleaners or any cleaning method that may damage the device.
- Ensure the device is completely dry before storing or charging.

ON THE PLANE

17 Travel and International Use

When travelling to another region, ensure the device is only supplied with a suitable 5V DC low-voltage power source. **DO NOT** use fast chargers or power supplies that do not meet the charging requirements in this manual.

Before travelling by air, confirm with the airline whether the device can be carried and/or used during the flight.

Always store the device in the supplied pouch or protective packaging during travel. **DO NOT** bend, crush, stretch, sit on, lie on, or step on the mask while packing, carrying, or storing it.

IF SOMETHING FEELS OFF

18 Troubleshooting

If the suggested action does not resolve the issue, or if the issue returns, contact BON CHARGE customer support. **DO NOT** attempt to open, modify or repair the device.

PROBLEM	POSSIBLE CAUSE	SOLUTION
The device does not switch on.	The device may not be charged, connected correctly, or receiving power.	Check the device in this order: ▪ Make sure the charging cable is fully inserted into the controller or device charging port. ▪ Make sure the charging cable is fully inserted into the power outlet or USB power source. ▪ Try a different power outlet or USB power source. ▪ Charge the device before trying again. ▪ Make sure the mask cable is fully connected to the controller. ▪ Press and hold the on/off button for 1 second.
The device switches off unexpectedly.	The battery level may be too low.	Charge the device fully before using it again. If the issue continues after charging, stop using the device and contact BON CHARGE Customer Support.

The device feels hot or uncomfortable during use.	The session may be too long, the device may be damaged, or your skin may be sensitive to light.	Take the following steps: ▪ Stop use immediately. ▪ Remove the mask from your face. ▪ Allow the device to cool. ▪ Check the device for visible damage before using it again. ▪ **DO NOT** resume use if the device appears damaged, continues to feel unusually hot, or causes discomfort. ▪ Consult a healthcare professional if discomfort continues or you are unsure whether to use the device again.
Your skin appears red, itchy or irritated after use.	You may be experiencing light sensitivity or a skin reaction.	Take the following steps: ▪ Stop use immediately. ▪ **DO NOT** continue using the device until the reaction has resolved. ▪ Consult a healthcare professional if the reaction is severe, unexpected, or does not resolve. ▪ Contact BON CHARGE Customer Support.

KEEP IT WORKING WELL

19 Maintenance and Repair

The device contains no user-serviceable parts.

- **DO NOT** open the device.
- **DO NOT** modify the device.
- **DO NOT** attempt repairs.
- **DO NOT** replace the internal battery.
- **DO NOT** use the device if it has been damaged.

If the device is damaged, malfunctioning or showing signs of battery leakage, stop using it and contact BON CHARGE customer support.

RESPONSIBLE DISPOSAL

20 Disposal

DO NOT dispose of the device with household waste.
The device contains a lithium-ion battery and should be recycled or disposed of according to local regulations. Follow local electrical waste and battery disposal requirements to help protect the environment.

If you are unsure how to dispose of the device, contact your local waste authority.

THE FINE PRINT

21 Warranty and Returns

BON CHARGE products are covered by a 12-month limited warranty against defects in materials and workmanship under normal use. The warranty period begins on the date the product is purchased by the original customer.

In some countries or jurisdictions, applicable law may provide additional rights or require a longer minimum warranty, guarantee or liability period. Where this applies, the longer mandatory period and any additional consumer rights will continue to apply.

Nothing in this warranty excludes, restricts or modifies any warranty, guarantee, condition, right or remedy that cannot lawfully be excluded, restricted or modified under applicable consumer law.

If your product develops a fault, please contact BON CHARGE Customer Support as soon as possible. To help us assess your claim, we may ask you to provide photographs or a video of the issue, proof of purchase, or return the product for inspection.

If we confirm that the product has a defect covered by this warranty, BON CHARGE will provide an appropriate remedy, which may include repair, replacement or a refund. BON CHARGE will also cover reasonable return shipping costs where required.

This warranty:

- Applies only to the original retail purchaser.
- Requires original proof of purchase.
- Applies only when purchased from an authorised retailer or reseller.
- Applies only when the device is used with authorised accessories and as instructed.

This warranty does not cover damage caused by:

- Accident, misuse, abuse or alteration.
- Improper care or storage.
- Normal wear and tear.
- Use with unauthorised accessories.
- Use other than as instructed.
- Connection to incorrect current or voltage.

For the most up-to-date information on returns, including eligibility, timeframes and any applicable fees, please visit www.boncharge.com/pages/shipping-returns or contact BON CHARGE Customer Support and follow the instructions provided.

BON CHARGE is not responsible for incidental, special or consequential damages resulting from use of the device, except where such exclusions are not permitted by applicable law.

If the device becomes defective within the warranty period, contact the retailer where the device was purchased or the BON CHARGE Customer Support team.

DO NOT return the product to any address listed in this manual.

22 Safety Standards and Regulations

The device has been tested to, or complies with, the following standards and regulations:

Standard or regulation	Description
IEC 60601-1:2005 + A1:2012 + A2:2020	Medical electrical equipment: general requirements for basic safety and essential performance.
IEC 60601-1-2:2014	Medical electrical equipment: electromagnetic compatibility requirements and tests.
IEC/EN 60601-1-11:2015	Requirements for medical electrical equipment and medical electrical systems used in the home healthcare environment.
EN 55014-1:2021	Electromagnetic compatibility: emission requirements for household appliances, electric tools and similar apparatus.
EN 55014-2:2021	Electromagnetic compatibility: immunity requirements for household appliances, electric tools and similar apparatus.
EN 60335-1:2012 + A1:2019 + A15:2021 + A16:2023	Household and similar electrical appliances: general safety requirements.
EN 60335-2-27:2013 + A1:2020 + A2:2020 + AC:2021	Household and similar electrical appliances: particular requirements for appliances for skin exposure to optical radiation.
EN 62311	Assessment of electronic and electrical equipment related to human exposure restrictions for electromagnetic fields from 0 Hz to 300 GHz.
EN 62233:2008 + AC:2008	Measurement methods for electromagnetic fields of household appliances and similar apparatus with regard to human exposure.
IEC 60601-2-83	Medical electrical equipment: particular requirements for the basic safety and essential performance of home light therapy equipment.
IEC 60601-4-2	Medical electrical equipment: electromagnetic immunity guidance and interpretation.
IEC 61000-4-39	Electromagnetic compatibility: radiated fields in close proximity immunity test.

BS EN 55014-1	Electromagnetic compatibility: emission requirements for household appliances, electric tools and similar apparatus.
BS EN 55014-2	Electromagnetic compatibility: immunity requirements for household appliances, electric tools and similar apparatus.
BS EN 60335-2-27	Household and similar electrical appliances: particular requirements for appliances for skin exposure to ultraviolet and infrared radiation.
BS EN 62311	Assessment of electronic and electrical equipment related to human exposure restrictions for electromagnetic fields from 0 Hz to 300 GHz.
BS EN 62233	Measurement methods for electromagnetic fields of household appliances and similar apparatus.
IEC 62471:2006	Photobiological safety of lamps and lamp systems.
ISO 15223-1:2021	Medical devices: symbols to be used with information supplied by the manufacturer.
ISO 14971:2019	Medical devices: application of risk management to medical devices.
IEC/EC 62133-1:2017	Safety requirements for portable sealed secondary cells and batteries containing alkaline or other non-acid electrolytes: nickel systems.
IEC/EC 62133-2:2017	Safety requirements for portable sealed secondary cells and batteries containing alkaline or other non-acid electrolytes: lithium systems.
EN 55014-1:2006 + A2:2011	Electromagnetic compatibility: emission requirements for household appliances, electric tools and similar apparatus.
RoHS Directive 2011/65/EU	Restriction of hazardous substances in electrical and electronic equipment.
REACH Regulation EC 1907/2006	Registration, Evaluation, Authorisation and Restriction of Chemicals.
Battery Regulation EU 2023/1542	Battery compliance requirements.

REFERENCES

23 Symbols Glossary

For a more comprehensive description of the symbols displayed on the device and package labels, please refer to the Symbols Glossary page on our website: https://boncharge.com/pages/faqs#faq-glossary-of-symbols

 Keep away from direct sunlight	 Manufacturer
 Meets safety and performance standards for sale in Europe.	 Complies with FCC limits for electromagnetic emissions
 Do not stare at light source	 Consult instructions for use
 Manufacturing date	 Recycle cardboard
 Safe to use within these temperature ranges	 Safe storage and transport within these temperature ranges
 Use the device only within these humidity	 Safely store and transport the device only within these humidity
 Keep Dry	 Product distributor
 Do not dispose in household waste. Separate collection for electrical and electronic equipment.	 RoHS directive 2011/65/EU - Restriction of the use of certain hazardous substances in electrical and electronic equipment
 UK Conformity Assessed as per UK Directives on health, safety and environmental protection standards	 Lithium-ion battery is part of the device

Only use USB cable provided	This symbol indicates the date when the medical device was manufactured.
Complies with Australian and New Zealand electrical safety and electromagnetic compatibility standards	EU Representative
Not made with natural rubber latex	Safe for use when not connected to mains voltage
This symbol indicates that the product is protected against solid foreign objects of 12. 5 mm and vertically falling water drops when enclosure tilted up to 15°.	This symbol indicates that caution is necessary when operating the device or control close to where the symbol is placed, or that the current situation needs operator awareness or operator action in order to avoid undesirable consequences.
